#### CANDIDATE STATEMENT AS UIA PRESIDENT:

As a global organization of architects, the UIA fosters equity, gender parity, inclusivity, mutual respect and a culture of future-preparedness. I am deeply committed to serving the UIA’s goals with honesty, integrity, transparency, and dedication.

As president I will collaborate with the UIA leadership to design and implement the any proposed changes by the general assembly in Copenhagen. At the crucial juncture of the UIA’s 75th anniversary, the past collective experience of the organization should guide us to create a governance model that works for our time. Building alliance with other global and regional organizations concerned with the built environment to combat climate change, mitigate global inequality, crisis and conflict, will be my top priority.

I am indebted to the UIA for my organizational growth in the last 15 years. Valuable life lessons learned through working in different role at UIA and allied partner organizations. These experiences enriched me with new perspectives towards the implementation of a sustainable, human-centric, technology-efficient, and zero-carbon built environment by 2030.
