CANDIDATE'S STATEMENT/ DECLARATION DU CANDIDAT (maximum 200 characters):

Architecture serves humanity and societies. Since I met the architectural founder Pier Vago after the 1986 Cairo congress, I was also very impressed by the nomination Architect Hassan Fathy, for the first gold medal award from the UIA for his achievements. In architecture for the poor, architecture for the environment, and service to human communities, at that moment I admired the essence of the UIA constitution which (architecture to serve humanity) and realized my great influence in Vago's thought and vision in making UIA a global beacon for the advancement of architecture around the world as he served it in his journal (L 'architecture aujourd'hui) The obstacle was the facilitation of support and care? Some solutions and visions were contemplated to achieve the goals through the consolidation and sponsorship of the ambitious activities that promote themselves UIA and the marketing of sustainable development to spread scientific and architectural awareness. Let's stand together and make the best choices and together we can be the best through smart solutions..... UIA treasurer Dip. Arch. Seif Allah ALNAGA
