PROFESSIONAL STUDIES

Master Degree in Architecture at the University of Innsbruck in 1996
Continuous Professional Development

PROFESSIONAL EXPERIENCE

Since 1998 I worked for Michael Hopkins and at the London Metropolitan University and as self-employed architect in London
Since 2004 I am owner of an Architectural Office in Innsbruck : <http://www.fuegenschuh.at/>

The office focuses on a wide range of typologies. This includes residential, retail, office, educational buildings, landscape architecture as well as special projects such as a headquarter for UN agencies on the Balkans. Projects were commissioned from both private and public clients. All larger schemes were acquired through open architectural design contests. Over the past years one essential goal has been to develop high quality architectural solutions for existing, to be re-used houses.

PRIOR VOLUNTEER EXPERIENCE

Since 2010 I have actively been involved in the work of the architects' professional representation on national and European level after chairing an architecture centre in Innsbruck several years:

Board member of the Architects' Council of Europe
Präsident of the Austrian Chamber of Architects and Chartered Engineering Consultants
Former Vice President of the Austrian Chamber of Architects and Chartered Engineering Consultants and former President of the Federal Section of Architects
Member of the Austrian Committee for Baukultur
Member of the Austrian Steering Group for the Open Method of Coordination (OMC) group of Member States' experts on High-quality architecture and built environment for everyone
Member of the European Sub-group Architects for the Group of Coordinators for the Recognition of Professional Qualifications in the EU
Jury member in several Austrian and international ADCs

PERSONAL INTERESTS

Mountains, skiing and other sports
Children and family
International and intercultural private and professional exchange
Baukultur

STATEMENT (max. 200 characters)

I firmly believe that the quality of the (built) environment is an essential factor for raising the living quality of people in the world and for the implementation of a fair green transition.
