**PERSONAL INTERESTS**

Reading, walking, traveling, social work, et al.

**STATEMENT** (*max. 200 characters*)

I am very pleased to send my candidature as Member of the UIA Council and serve UIA after many years of experience and presence in UIA as: Region II alternate council member, Member of UIA-PHG, President of UIA Greek Section, Member of the EDUCOM Committee.

Based on the above my willingness to serve UIA from the post of the Member of UIA Council is the result of all my efforts in Architecture in order to bring together all aspects: Society, Culture, Environment, Technology/Construction, Aesthetics, Education/Research and Mobility of architects, Equality, young architects in difficult times.

Since architecture is a social art also and an instrument of social interaction, it is time for architecture to overcome nostalgia for our previous cities where we live and become part of how we conceptualize the future of our cities creating a balance, between Ethics and Aesthetics.

I will focus towards upgrading the role of the architect in the built environment together with Solidarity and Friendship, based on the UIA basic principles connecting architecture in a troubled global scene.

Being involved in UIA-PHG for many years I believe that commissions and Work Programs are the basic bodies for transparency of the UIA role worldwide.
