PERSONAL INTERESTS

- Optimize and contribute to the professional context of architects and urban planners, contributing to the work environment.
- Support the development of the country, raising the quality of life of the population through the implementation of innovative and functional concepts in architecture and urban planning. In this way, generate a social impact in both rural and urban communities.

STATEMENT

As a Colombian section, it is of great interest to work, either in the bureau or in the council, to contribute to the following objectives:

1. Communicate and propose solutions to contribute to the architectural problems of the world, emphasizing what concerns architects.
2. Build a UIA closer to the sections, that listens, understands and supports each of them, which, added to the management with multilateral organizations, contributes to the solution of a large part of the issues that affect the professional practice of architecture in the world.
3. Optimize and increase the scope of UIA projects, establishing cooperation ties between sections, to obtain as a result, the possibility of developing in double or multiple ways the level of architecture in our countries.
