STATEMENT

Throughout the 2021/2023 mandate I have been honoured to represent and promote the work of African architects, as well as to help architects around the world to be able to showcase their art. I would like to thank all the Sections that gave me this opportunity to serve our profession on an international level. I therefore ask the Member Sections to renew their trust in me if they believe that I have fulfilled my obligations in this role. During the current mandate, Tunisia organised its first open international competition sponsored by the UIA, for the 'Requalification of Byrsa Acropolis and Rehabilitation of the Carthage National Museum', already classed as a UNESCO World Heritage Site. 94 entries were received from 30 different countries, including from some very prestigious names in architecture. I am very proud to have contributed to the success of this competition. During this mandate, 13 Tunisian architects have actively participated in a range of UIA Work Programmes and Commissions. Tunisia has organised a range of events with the sponsorship of the UIA. I have attended the majority of Council meetings in person and have always tried to contribute to the best of my ability. I have tried to represent Africa, the Mediterranean and Tunisia as comprehensively as possible.
